Introduction to Torchmate Workshop

This workshop will give attendees valuable experience in operating Lincoln Electric's Torchmate CAD software and plasma table. Participants will design and cut nameplates, welcome signs, and design other projects. Time will be dedicated to troubleshooting. We will also discuss funding your program with the Torchmate!

This workshop will be taught by **Iggy Cendejas**, lead trainer at Torchmate and facilitated by **Dr. Ryan Anderson**, Assistant Professor, Agricultural Education and Mechanics. Please contact him at r_a461@txstate.edu for more information related to the workshop.

Please use judgingcard.com to register for the workshop.
