

Interested in a Semiconductor Industry Internship Program?

The next round of interviews for such positions with Intel is tentatively scheduled for October 2023.

Enroll in the Fall MT classes to be eligible for the internship.

For details contact:

Fontaine Roberson | fontaine.roberson@pcc.edu or Bill Manley | bmanley@pcc.edu

"My internship was a wonderful experience. I was assigned to work on the most difficult toolset in my department, and I found out from my manager that it's because I impressed one of the interviewers so much that he actually recommended that I be placed there. It's absolutely thanks to the MT program that I was so prepared for the interview process. As soon as I graduated, Intel was able to offer me a full-time position as a manufacturing equipment technician, and my experience from the internship made my transition seamless--I didn't even have to interview again! I think I've really impressed my new teammates with the skills I learned from the MT classes since they are directly applicable to my current job. My team is really nice and supportive, and I'm having fun learning new things every day!"

2023 MT Graduate~

**FALL TERM STARTS SEPTEMBER 25TH.
